Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 26 February 2004.

2a) This action is FINAL. 2b) This action is non-final.

DETAILED ACTION

Priority

1. This application filed under former 37 CFR 1.62 lacks the necessary reference to the prior application. A statement reading "This is a Divisional of Application No. 09/991,984, filed November 26, 2001." should be entered following the title of the invention or as the first sentence of the specification. Also, the current status of the parent nonprovisional application(s) should be included.
2. In the instant application, the current reference to the prior application does not follow the title and is not the first sentence of the application.
3. The current reference to the prior application states that the instant application is a continuation of the prior application, when it appears that the instant application is divisional of the prior application.
4. The current reference to the prior application also lacks the current status of the prior application, which is now US Patent No. 6,784,459.

Specification

5. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
6. The following title is suggested: --AN ORGANIC ELECTROLUMINESCENT DEVICE WITH A COATING AREA BROADER THAN AN OPTICAL AREA AND MANUFACTURING METHOD THEREOF--.

Allowable Subject Matter

7. Claims 1-11 are allowed.
8. The following is a statement of reasons for the indication of allowable subject matter: Regarding independent claim 1, the prior art of record neither shows or suggests a method for manufacturing an organic electroluminescent (EL) device comprising, in addition to other limitations of the claim, defining an effectively optical area in which a plurality of electrodes are formed and defining a coating area that is broader than the effectively optical area, in which a composition including the organic EL material is to be coated. Due to their dependency upon independent claim 1, claims 2-8 and 11 are also allowable.
9. Regarding independent claim 9, the prior art of record neither shows or suggests a method for manufacturing an organic EL device comprising, in addition to other limitations of the claim, forming an organic EL layer both on areas that are to be an effectively optical area and on other areas that are not to be the effectively optical area.
10. Regarding independent claim 10, the prior art of record neither shows or suggests a method for manufacturing an organic EL device comprising, in addition to other limitations of the claim, forming an organic EL layer in areas not having electrodes and which are suppose to be an effectively optical area.

Conclusion

11. This application is in condition for allowance except for the formal matters cited earlier in this office action.

12. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

13. A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
